

QuietPutty™ QP-380

Acoustical putty for residential and commercial construction

QuietPutty™ is a moldable putty designed to maintain the performance of acoustically rated walls with penetrations such as electrical outlets, HVAC ducts, water hookups and cables.

Maintain high acoustical performance of wall assemblies.

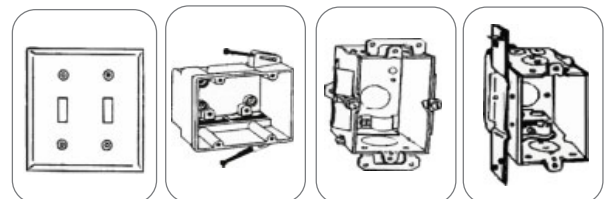

Maximum Achievable STC Rating with an Acoustical Leak in a 100 Square Foot Wall

- QuietPutty requires no special tools - it is formed by hand.
- QuietPutty will not dry out or shrink. It adheres to most construction materials for a high integrity seal.
- QuietPutty is asbestos-free and has no odor. The material is noncorrosive to metal and plastics.
- Provides a draft and cold smoke seal in the installed condition.

Ideal areas of application include:

- Electrical outlet boxes
- Phone outlet boxes
- Electrical switches
- Plumbing hookups

Technical Data

Physical Properties:

Color	Blue/Green
Odor	No odor
Approx. Weight	6oz / Pad
Approx. Density	1oz / in ³
Unit Size	10 pads per box
Thickness	1/8 in
Size	7 in x 7 in Pad

Application of the Product

No tools required. Simply adhere putty manually to back of outlet box or target area.

Design all wall penetrations per the fire resistance requirements of your state or local fire code. QuietPutty is to be used as an addition to such a design.
